environmental sciences

DMUG 2014

The IAQM is the professional body for air quality professionals and the voice of air quality in the UK, providing useful and timely guidance on matters affecting air quality professionals and responding to Government consultations. We also publish reports and journals concentrating on the science, modelling, policy and legal issues surrounding air quality.

We are pleased to be hosting the Dispersion Modellers User Group conference again this year, an event which provides an excellent platform to discuss issues around dispersion modelling. Delegates will have the opportunity to listen to talks from some of the best scientists and consultants in the field, as well as network with other air quality professionals working in the sector.

Sponsored by

Air quality monitors, a market leader in the local authority air quality management sector whose team have a total of over 100 years of experience in air quality monitoring.

With a wide product portfolio that focuses on ambient air quality - whether it be particles or gases, real time or sampling they are able to find a solution for most applications.

Programme

10:30 Roger Barrowcliffe (IAQM): Welcome and Introduction

10:40 Christine McHugh (Amec Foster Wheeler): Comparison of Air Quality in World Cities

11:10 Sean Beevers (Kings College): Update on progress with the development of a hybrid personal exposure model

11:40-11:55 Break - Tea, coffee, networking

11:55 Rebecca Morris (Ricardo-AEA): Modelling the local mortality burden of PM2.5

12:25 James Tate (Leeds University): Making better use of microsimulation models for estimating vehicle emissions

12:55 Duncan Laxen (AQC): Linking ADMS with microsimulation models

13:25-14:15 Lunch

14:15 Yvonne Brown (Bureau Veritas): Changes to the Emission Factor Toolkit

14:45 Scott Hamilton (Ricardo-AEA): Modelling the impact of road traffic emissions in Riyadh using open source models and rapid geoprocessing

15:15-15:30 – Break - Tea, coffee, networking

15:30 Martin Seaton (CERC): Advances in the treatment of street canyons and urban canopy flow in ADMS-Urban and ADMS-Roads

16:00 Michael Bull (Arup): Observed variations between models for cumulative impact assessment

16:30 Roger Barrowcliffe (IAQM): Closing Remarks

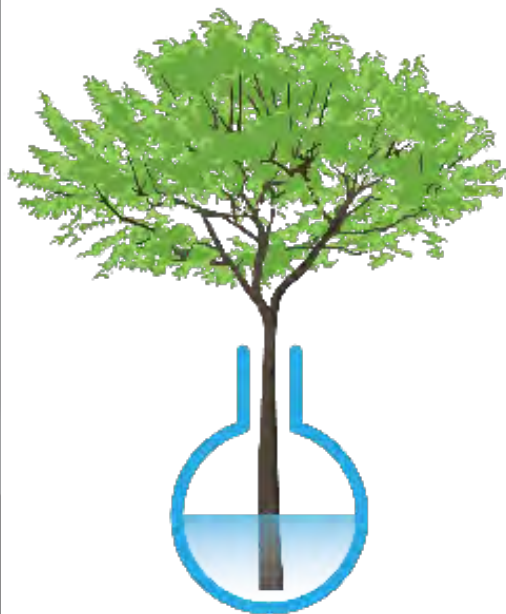

16:45 Close

Delegates

Name	Company
Gordan Allison	CH2M Hill
Helen Apsimon	Imperial College
Roger Barrowcliffe	IAQM
Sean Beevers	Kings College
James Bellinger	Arup
Paul Bentley	Create consulting
Chris Boocock	Aeris Europe Limited
James Brookes	Mott Macdonald
Yvonne Brown	Bureau Veritas
John Bruce	Portsmouth University
Michael Bull	Arup
Dr David Carruthers	CERC
Rosemary Challen	RPS
Diletta Cordesch	AECOM
Laura Crowe	Caulmert Ltd
Kyri Eleftheriou	Royal Borough of Kensington and Chelsea
Dr Andrew Ellis	CERC
Christelle Escoffier	Exponent International Limited
Luke Farrugia	CH2M Hill
Emma Fell	IAQM
Chloe Fellows	WSP UK
Bernard Fisher	IAQM
Rosalind Flavell	Fichtner Consulting Engineers Ltd
Peter Fleming	TRL
Amanda Gair	Gair Consulting Ltd
Dr Scott Hamilton	Ricardo-AEA
David Harvey	ADM Ltd
Carl Hawkings	ADM Ltd
Katrina Hawkins	Smith Grant LLP
Leon Hibbs	Environmental Protection, Reigate & Banstead Borough Council
John Hodgson	Environmental Resources Management Ltd
Steve Hoskin	Air Monitors LTD
Vicky Jackson	Sefton Council MBC
Marilena Karyampa	Arup
Duncan Laxen	Air Quality Consultants Ltd
Kieran Laxen	Air Quality Consultants Ltd
Toby Lewis	Huntingdonshire District Council
Dewi Lloyd	Smith Grant LLP
Claire Lucas	Mouchel
Paul Manktelow	CH2M Hill
Rebecca Mccollom	Wardell Armstrong
Christine McHugh	Amec Foster Wheeler
Adam Miles	Aeris Europe Limited
Christopher Mills	Mott Macdonald
Rebecca Morris	Ricardo-AEA

Name	Company
Daniel Mullick	Accon
Nafeezah Padamsey	Atkins Global
Christine Park	Accon
Jack Pease	Air Quality Bulletin
Kanan Purkayastha	Havering Council
Rebecca Rose	Ricardo-AEA
Dr Simon Scott	Environment Agency
Dr Martin Seaton	CERC
Angela Spanton	Envirobods Ltd
Christopher Squires	Parsons Brinckerhoff
Andy Talbot	Atkins
James Tate	Leeds University
Shyn Tong	Public Health England
Jason Webb	Foster Wheeler Energy Ltd
Ian Whitwell	RWE Generation UK plc
Katrina Young	Aether

Become Chartered through the IES

CEnv
Chartered-Environmentalist

CEnv qualification denotes sound knowledge, proven experience and a profound commitment to sustainable best practice. There are over 6,300 registered Chartered environmental professionals. The IES runs a unique and popular workshop called 'CEnv in a Day', which mentors participants through the Chartership process.

CSci
Chartered Scientist

The CSci designation demonstrates a high level of competence and professionalism in science. At present there are over around 15,000 Chartered Scientists working across all sectors of science. With a streamline process for Fellows and those who have already achieved CEnv, the IES remains one of the best avenues for you to achieve Chartered Scientist.
